

Sprint Goal

- Implement core user interface skeleton with basic authentication and question retrieval capabilities, establishing the foundational architecture and backend services that will support future development.

Team Capacities

- Kelly Vu
 - Base Hour: 10 🙄
 - 2 CS Projects and essay reduce hours by 5
- Eli
 - Base : 10
 - Probably stay at base capacity
- Jack
 - Base: 10
 - 1 CS project may reduce hours by 2 but unlikely
- Will
 - Base: 10
 - 8 hours - travelling
- Ryan
 - Base Hours: 10
 - Not much else going on

Planned User Stories

- US0.9 - Home Page
 - In progress
 - Frontend skeleton with navigation structure
 - Basic layout and routing setup
- US0.6 - Account Login Interface
 - Basic login/register endpoints
 - User database schema
 - Authentication system backend
- US0.11 - Multiple Choice Question Taking Interface
 - Displays questions to user and takes input

- US0.12- True False Question Taking Interface
 - Displays questions to user and takes input
